

CMR Efficacy at Reducing Microbial Populations on Surfaces

Staphylococcus aureus Methicillin Resistant

99.8%
reduction

Staphylococcus aureus

98.5%
reduction

Pseudomonas aureginosa

99.0%
reduction

Streptococcus spp.

96.4%
reduction

Escherichia coli

98.1%
reduction

Stachybotrys chartarum .

99.93%
reduction

Listeria monocytogenes

99.99%
reduction

Candida albicans

99.92%
reduction

Norovirus

99.99%
reduction

H1N1

99.99%
reduction
