

CMR Safety

OSHA: According to the Occupational Safety and Health Administration, 1 part per million of hydrogen peroxide gas is safe throughout the day. The CMR infection control system is Ozone-free and uses only 1/50th (.02ppm) of hydrogen peroxide gas that is deemed safe and is self controlling. (Dr. James L. Marsden PH.D. at Kansas State University)

EPA: CMR infection control system is under category of UV devices and subject to FIFRA, 40 CFR 152.500, 40 CFR 156.10, and 41 FR 51065 of November 1976
